

Graphene Paint adds value to your operations by:

- 66% maintenance cost reduction per platform
- Ensuring zero safety incidents caused by external corrosion throughout its warranty period.

How it Works

The properties of Graphene Paint create additional barriers that slow down corroding agents from reaching the steel surface to extend the surface protection for a structure and double its lifespan.

- ProShield+ does not require any changes to the existing blending process.
- ProShield+ can be applied similarly as any other painting coats.

Paint to Last

ProShield+™ is a specially formulated paint additive that offers lasting protection to your assets even in the harshest condition and doubles its lifespan.

ProShield+™

An Advanced Materials Solution

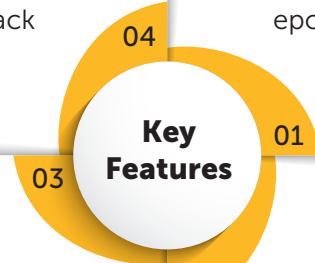

Specially formulated paint to protect your assets

Withstands impact test for up to **18 Joules** without surface crack

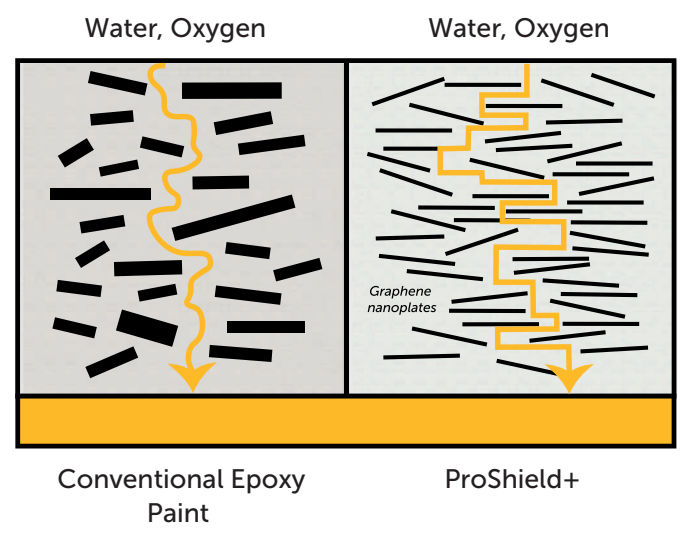

Water barrier properties **3X** higher than neat epoxy paint

3X improvement in abrasion properties

Improvement by **50%** in adhesion

Passed SIRIM Short Term Tests (Adhesion, Abrasion, and Impact)

Coatings for offshore, onshore and marine structures

Coatings for port/jetty facilities

Services

Coating inspection and repair

Kasawari Project Management Team achieved another milestone by deploying Graphene paint to coat the 1000m² surface area on the splash zone and landing area of Kasawari's structure at the Malaysia Marine and Heavy Engineering Sdn Bhd (MMHE) yard prior to its sail-away.
